

SYED ISFAAR AHMED

Interior Designer | Fit-Out & Execution | 3D Visualization

Dubai, UAE | [054 786 4317](tel:0547864317) | Syedisfarahmed@gmail.com | [LinkedIn Profile](#) | [Portfolio Website](#) | [Behance profile](#)

PROFESSIONAL SUMMARY

Interior Designer with 6+ years of combined experience spanning interior design, fit-out execution, site supervision, client coordination and 3D visualization across residential, retail, healthcare and commercial projects. Proven ability to manage full fit-out lifecycles independently — from space planning, demolition and MEP coordination through to final furniture installation and handover. Skilled in producing detailed AutoCAD working drawings, including sectional and elevation views, furniture layout plans and reflected ceiling plans (RCP), alongside photorealistic SketchUp, Enscape and V-Ray renders to support design development, client presentation and approval.

CORE SKILLS

Execution: Demolition, MEP coordination, site supervision, site coordination, contractor & vendor management, material selection, fit-out execution

Visualization: SketchUp, Enscape, V-Ray, AutoCAD (working drawings, sections, elevations, furniture layout plans, reflected ceiling plans), photorealistic rendering, material specifications, mood boards

Client-Facing: Independent client ownership, requirement translation, presentation delivery, deadline management

Software & Tools: SketchUp, Enscape, V-Ray for SketchUp, AutoCAD, Adobe Photoshop (image retouching, background removal), Microsoft Office (portfolio and client decks).

KEY ACHIEVEMENTS

- Converted cold portfolio and referral inquiries into signed projects, including The Petnest and Dr. Jagrati's Dental Clinic, without a dedicated sales or marketing function.
- Repeatedly compressed design finalization to 4–15 days across projects while maintaining client approval and build quality, including under fixed-date deadlines such as a clinic's opening ceremony.
- Operate as a one-person project lead across design, procurement, multi-trade execution and client communication — a combination most fit-out teams split across two to three roles.

PROFESSIONAL EXPERIENCE

Interior Design, Fit-Out & Execution Professional

Iconoclast Innovations | Hyderabad, India | April 2020 – August 2026

- Lead residential, retail, healthcare and commercial interior fit-out projects from client briefing and space planning through design development, execution and handover.
- Develop 3D visualizations, furniture layouts, material concepts and design presentations using SketchUp, Enscape and V-Ray, with working drawings using AutoCAD.
- Coordinate multi-trade execution including carpentry and joinery, electrical, plumbing, HVAC, painting, furniture installation and finishing works.
- Manage contractors, vendors, suppliers and labour teams; ensuring execution follows approved designs, quality standards and project timelines.
- Handle client communication, requirement translation, design revisions and site coordination and problem solving throughout the project lifecycle.

- Coordinate material selection and procurement while maintaining project cost records, labour expenses and project-level profitability.
- Independently manage projects under tight deadlines, including fast-track residential, retail and healthcare fit-out projects.

Site Supervisor

Almuftah Interiors | Doha, Qatar | August 2018 – August 2019

- Supervised on-site workers, ensuring all execution matched the approved drawings provided to the team.
- Coordinated with HVAC teams ahead of ceiling and furniture installation to keep multi-trade work sequenced correctly.
- Prepared work schedule and progress report documentation to track site status.
- Printed drawings and posted them on-site, briefing workers on the scope of work before execution began.

FEATURED PROJECTS

Independent Villa — Full Design & Execution (2,300 sq ft, G+1)

Direct client engagement · SketchUp, Enscape

Engaged directly after the client rejected templated designs proposed by other designers. Delivered a custom G+1 villa with functional space planning, kitchen, living-dining zoning, bedroom and dressing solutions. Led design and on-site execution; design finalized in 15 days and execution completed in ~3 months.

The Petnest — Pet Store Design & Execution (2,400 sq ft)

Inbound client via portfolio · SketchUp, Enscape

Client sourced through online portfolio search. Independently led space planning across retail zones, a grooming room with full plumbing setup, and a space-efficient cafeteria, plus custom reception desk and themed lighting. Design finalized in 4 days; execution completed in 45 days.

Dr. Jagrati's Dental Clinic — Design & Execution Lead (2774 sq ft)

Referral client · SketchUp, Enscape

Delivered 2D layout, 3D visualization, mood boards, and material catalogues under a hard deadline tied to a fixed opening ceremony date with international guests. Led multi-trade execution — carpenter, external factory for storage, plus personally managed plumbing, electrical, HVAC, painting, and furniture. Design finalized in 7 days; full execution completed in 15 days. Client satisfaction led to an invitation to the clinic's opening ceremony.

Residential-to-Office Conversion (3,350 sq ft)

Direct client engagement · SketchUp, Enscape

Converted an existing 3BHK apartment into a fully functional corporate office for a business owner. Given complete creative freedom on design and layout. Managed the project end-to-end: measurements, 2D layout, demolition, 3D design, and full execution — ceiling, wiring, lighting, AC, plumbing, flooring, and workstation installation. Delivered within the agreed 3-month timeline.

EDUCATION

Master of Business Administration - Finance, Nizam Institute of Engineering & Technology
